Frontend Workflow Guide

Section A — Auth Pages

A1 — Landing / Login Page

Route: / | Visible to: logged-out users only (redirect to /home if already logged in)

Hero Section

- Logo, headline, subheading, two buttons: Get Started and Login

Features Section

- 3-4 cards: Event Discovery, Founder's Launchpad, Campus Networking, Smart Recommendations

Login Form

- Email, password (show/hide), Forgot Password link, Login button, error state, sign-up link

Sign Up Form

- Full name, email, password with strength indicator, confirm password, university, year of study
- Role selector (3 cards): Student / Founder / Event Manager
- Interest tags multi-select, Sign Up button, terms checkbox

A2 — Forgot Password

Route: /forgot-password | Visible to: logged-out users

- Email field, Send Reset Link button
- Success state: confirmation message with email shown
- Error state: no account found message

A3 — Reset Password

Route: /reset-password/:token | Visible to: anyone with a valid reset link

- New password + confirm password fields, strength indicator
- Success: redirect to login after 3 seconds
- Error: expired link message with link back to forgot-password

A4 — Email Verification

Route: /verify-email/:token | Visible to: new users clicking verification email

- Loading state: spinner
- Success state: checkmark + Go to Home button
- Error state: invalid/expired link + resend button

A5 — Onboarding Flow

Route: /onboarding | Visible to: new users on first login only (one-time)

Step 1 of 3 — Welcome

- Greeting with first name, short explanation, Let's Get Started button

Step 2 of 3 — Interests

- Tag chip grid, minimum 3 required, Continue button disabled until met, Skip link

Step 3 of 3 — Profile

- University, year of study, bio (160 char), LinkedIn, GitHub, avatar upload
- Finish Setup redirects to /home, Skip also redirects to /home

Section B — Core Authenticated Pages

Shared Navbar

Appears on every page from Section B onwards.

- Logo (left) links to /home
- Search bar (center) with live dropdown: events, users, startups grouped by type. Enter goes to /search
- Notification bell with unread count badge
- Avatar dropdown: My Profile, Settings, Logout

B1 — Homepage / Feed

Route: /home | Visible to: all logged-in users

Left Sidebar (desktop)

- Avatar, name, role badge, university, follower/following counts, nav links, interest tags

Main Feed

- Upcoming Events Banner: horizontal scroll strip of events in next 7 days
- Infinite scroll feed with 4 card types:

- Event Card: cover image, society, title, description, tags, date/venue, capacity bar, like/comment/share, Register button
- Post-Event Highlight Card: media thumbnail, caption, linked event, like/comment/share
- Startup Spotlight Card: founder info, startup name, tagline, domain tags, roles needed, View Pitch button
- Society Update Card: text update with optional image, like/comment/share

Right Sidebar

- Recommended events, active societies, suggested people

B2 — Search Results

Route: /search?q=... | Visible to: all logged-in users

- Filter tabs: All, Events, People, Startups
- Filter bar changes per tab (events: tag/date/society/type; people: role/university; startups: domain/role)
- Empty state if no results

B3 — Event Discovery

Route: /events | Visible to: all logged-in users

- Create Event button (Event Managers only)
- Search + filters: tag, date range, society, event type, status (upcoming/ongoing/past)
- Grid / list view toggle, default grid
- Pagination or infinite scroll

B4 — Create / Edit Event Form

Route: /events/create and /events/:id/edit | Visible to: Event Managers only

- Basic info: title, short description (280 char), full description rich text, event type
- Date & location: start/end datetime, venue, online/in-person toggle
- Media: cover image upload with crop, additional photos/videos
- Tags: multi-select + custom tag option
- Capacity & registration: capacity, registration deadline, waitlist toggle, registration required toggle
- Sub-roles/segments (optional): segment name, capacity, lead assignment, volunteers
- Actions: Save Draft, Publish, Cancel. Edit adds: Unpublish, Delete

B5 — Event Detail Page

Route: /events/:id | Visible to: all logged-in users

Header

- Cover banner, title, society with follow button, tags, like, share

Info Block

- Date/time, venue, event type, organizer, capacity bar, registration deadline

Registration States (one shown at a time)

- Default: Register Now button
- Full: Join Waitlist button
- Registered: You're Registered + Cancel Registration link
- Waitlisted: position number + Leave Waitlist link
- Past / deadline passed: Registration Closed label

Content Sections

- Full description, segments list (if any), media gallery with lightbox
- Post-event highlights subsection (past events only)
- Rating: 5 stars, shown only to users who attended, after event date
- Comments: threaded, 2 levels, like/reply/report/delete, load more after 10

Event Manager Controls

- Edit Event, Delete Event, Manage Registrations (table + CSV export), Post Highlight, Manage Sub-Roles

B6 — User Profile Page

Route: /profile/:id | Visible to: all logged-in users

Profile Header

- Cover photo, avatar, name, role badge, verified badge, university, bio, external links
- Tags, stats (followers/following/events attended), Edit Profile or Follow + Message buttons

Tabs

- Activity: public actions feed
- Events: registered/attended list with status badges and ratings
- Startups: founder and co-founder cards
- Liked Posts: visible to owner only

Followers / Following Modal

- Searchable list, follow/unfollow per row

B7 — Profile Edit Page

Route: /profile/edit | Visible to: own profile only

- Avatar: change with circular crop or remove
- Cover photo: change with banner crop or remove
- Basic info: name, university, year, bio (160 char), role (read-only)
- External links: LinkedIn and GitHub with URL validation
- Interest tags: remove existing, add via picker modal (min 3)
- Privacy: show events attended, show startups, public profile toggles
- Actions: Save Changes (disabled if no changes), Cancel with unsaved warning

Section C — Startup Hub

C1 — Startup Listing

Route: /startups | Visible to: all users. Post button visible to Founders only.

- Search + filters: domain tag, required role, status
- Cards: startup name, founder, tagline, domain tags, roles needed, like count, View Pitch button

C2 — Create / Edit Startup Form

Route: /startups/create and /startups/:id/edit | Visible to: Founders only

- Basic info: name, tagline (100 char), logo upload
- Pitch content: problem statement, solution, business model, target audience (all rich text)
- Domain tags, roles needed, status dropdown
- Actions: Save Draft, Publish Pitch, Cancel. Edit adds: Delete

C3 — Startup Detail Page

Route: /startups/:id | Visible to: all logged-in users

Header

- Logo, name, founder link, domain tags, status badge, like, share

Pitch Sections

- Problem Statement, Solution, Business Model, Target Audience

Team Section

- Current team list with roles, open roles chips

Collaboration Request

- Request to Join button (non-members): role dropdown + message textarea
- After sending: Request Sent (disabled)
- Founder sees: Manage Requests button

Collaboration Requests Modal (founder only)

- Pending / Accepted / Declined tabs, accept and decline buttons per request

Updates Section

- Post Update button (founder): title, body, optional image
- Chronological updates list with like/comment, edit/delete for founder

Comments

- Same structure as Event Detail comments

Section D — Admin Pages

Shared Admin Sidebar

- Links: Dashboard, User Management, Content Moderation, Analytics, Tag Management, System Settings
- Back to Main Site link at bottom

D1 — Admin Dashboard

Route: /admin

- Stats cards: total users, events, registrations, active societies, flagged content, new signups today
- Charts: new users over time (line), events created (bar), both with date filters
- Flagged content preview table (5 most recent)

D2 — User Management

Route: /admin/users

- Search by name/email, filter by role/status/university
- Table: avatar, name, email, university, role, status, joined date, actions
- Actions per row: view profile, change role, verify, suspend (with duration + reason), ban
- Suspended rows yellow, banned rows red

D3 — Content Moderation

Route: /admin/content

- Filter by type (post/comment/startup/event) and status (pending/reviewed/dismissed/removed)
- Queue table: type, content preview, author, reported by, reason, date, status, actions
- Actions: view full content, remove, dismiss report, warn user, ban user

- Full content modal: complete post/media, all reports, all action buttons
- Broadcast Announcement: title, body, target audience selector

D5 — Tag Management

Route: /admin/tags

- Table: tag name, events using it, users with it, created date, actions
- Actions: edit inline, deprecate, delete (only if count is 0)
- Add new tag form with duplicate check

D6 — System Settings

Route: /admin/settings

- Platform name, maintenance mode toggle, allow registrations toggle, allow event creation toggle
- Feature toggles: Startup Hub, comments, likes, notifications, slow connection mode
- Save Settings and Reset to Defaults buttons

Section E — Settings Page

E1 — Settings

Route: /settings | Visible to: all logged-in users

Account Tab

- Email display with Change Email flow (current password confirm + new email + verification)
- University (editable), role (read-only), link to profile edit

Password & Security Tab

- Current password, new password with strength indicator, confirm, Update button
- Log out of all other devices button

Notifications Tab

- Individual toggles: likes, comments, replies, follows, event registration, event updates, startup match, announcements
- Master email notifications toggle

Privacy Tab

- Show events attended, show startup involvement, public profile, allow mentions from, show online status

Section F — Notifications Page

F1 — Notifications

Route: /notifications | Visible to: all logged-in users

- Mark All as Read button (shown only if unread exist)
- Filter tabs: All, Likes, Comments, Follows, Events, Startups, Announcements
- Each row: actor avatar, notification text, reference thumbnail, timestamp, unread dot
- Clicking marks as read and navigates to the relevant content

Notification Dropdown (from navbar bell)

- Last 5-8 notifications, Mark all as read link, View All Notifications link

Section G — Shared Components

Build these first. Document props and usage so all team members use them consistently.

Component	Notes
Navbar	Logo, search with live dropdown, bell, avatar menu. On all auth pages.
Admin Sidebar	Left nav on all /admin pages.
Event Card	Cover, title, society, date, venue, tags, capacity bar, like, comment, action button. Used in feed, /events, profile, search.
Startup Card	Name, founder, tagline, domain tags, roles needed, like, View Pitch. Used in /startups, feed, search.
Post-Event Highlight Card	Media thumbnail, caption, linked event, society, like, comment. Feed only.
Comment Thread	2-level threading, like/reply/report/delete per comment, load more. Used on /events/:id and /startups/:id.
Like Button	Icon + count, toggled state, optimistic UI update (reverts on error).
Tag Chip	Two variants: selectable (filters/pickers) and display-only (cards/profiles).
Role Badge	Pill label. Student / Founder / Event Manager / Admin.
Verified Badge	Small checkmark shown next to verified user or society names.

Component	Notes
Notification Dropdown	Last 5-8 items, mark all read, view all link. Triggered from bell icon.
Followers / Following Modal	Searchable list, follow/unfollow per row.
Tag Picker Modal	All tags as chips, click to select/deselect, Done button.
Confirmation Dialog	Title, warning text, red confirm button, cancel. Used for delete, ban, cancel registration.
Empty State	Illustration + heading + subtext + optional action button. Every listing page.
Skeleton Card	Grey placeholder shown while data loads. Prevents layout shift.
Image Crop Interface	Appears after any image upload. Circular or banner crop, Confirm/Re-crop buttons.
Lightbox / Media Viewer	Full-screen overlay, left/right arrows, X to close.
Toast Notifications	Success (green), Error (red), Info (blue). Bottom-right, auto-dismiss after 3-4 seconds.
Inline Form Validation	Red text under fields on blur. Red border on error fields.
